Subject: MLPAComments: MLPA: Don't Surrender to Package S!

To Whom It May Concern:

I am one of many recreational divers that love the diversity and beauty of the dive sites in Monterey and Carmel. Nothing brings me greater joy than to spend a few minutes in the underwater world and capture its beauty in a few photographs. I especially am awed at the large fish which I rarely see.

It is my understanding that you are leaning towards accepting Package S. Please reconsider the value of Package 2 as Package S does not extend protection for many popular diving areas.

If you accept Package S, please make the following modifications: prohibit spearfishing contests in the area, establish the Ed Cooper State Marine Reserve between the Breakwater and Lovers Point, and expand the SMR fence around the Pinnacles to include Dali's Reef.

Please consider the needs and desires of the majority who enjoy recreational activities of the area. Protect the marine life, so we can continue to enjoy them for years to come.

Thank you.
